**Subject:** Sierra Leone Breakthrough Action and PREDICT

Hi Tina and James,

It was great being able to spend most of the day Thursday with you (and Dorothy, Anton, and Kendra) in the BA office here in Freetown. I'm really glad to hear about the progress and updates to the "animals/zoonoses book" that you are putting together based from our original "bat-book" materials.

Also, very happy for you that the BA SLA and other gov't registrations are finalized. Phew!

I've cc'd here folks within PREDICT that form our working group for the bat-book. It would be great if you can share your latest updated draft when you get it back from your graphics folks. We're of course happy to take a look, and continue to help you refine the messages with technical input etc. I'm excited to see how it goes as you work push this out through the IFRC and FAO in-country communications folks.

I'll be in Freetown probably most of this week if you want to chat more in person and keep the conversation going.

I hope y'all are doing great!

-Brian
